```python
numbers = input("enter some nubers")
count_odd = 0
count_even = 0
for x in numbers:
        if not x % 2:
            count_even+=1
        else:
            count_odd+=1
print("Number of even numbers :",count_even)
print("Number of odd numbers :",count_odd)
```
